Summary

Flutter Developer with 2+ years of experience building and maintaining scalable mobile applications. Contributed to 15+ client applications, including a government job preparation platform with 100K+ downloads. Skilled in code review, debugging, performance optimization, API integration, and delivering production-ready applications for both the Google Play Store and Apple App Store.

Work Experience

Flutter Developer, Biddabari Publications 06/2024 – Present

- Built and maintained a government job preparation platform used by thousands of students, achieving 100K+ downloads.
- Developed and deployed 12+ core features, including course streaming, exams, offline video downloads, job circulars, blogs, and push notifications.
- Integrated 50+ RESTful API endpoints and optimized application performance for faster and more reliable data handling.

Flutter Developer, Freelancing

- Contributed to 15+ client applications, developing features including maps, real-time sockets, push notifications, audio/video calls, deep linking, encryption, and in-app purchases.
- Delivered multiple unfinished projects as production-ready applications, successfully releasing them across 2 major platforms: Google Play Store and Apple App Store.
- Performed API integration, debugging, code reviews, and performance optimization across 15+ applications to improve reliability and release quality.

Education

B.Sc. Course, Govt. Bangabandhu College

Skills

Mobile App Development

- Performance Optimization
- Debugging & Bug Fixing
- Theme Customization
- State Management: GetX, Riverpod, BLoC
- Firebase Integration
- REST API Integration
- Real-time Communication (Sockets)
- Maps & Location Services
- Audio/Video Calling
- IAP Integration

Languages

- Dart
- Java
- Javascript (Basic)
- Kotlin (basic)
- Python (basic)

Version Control

- Git
- GitHub

Backend (Basic)

- Node.js
- Express.js
- MongoDB

Projects

Biddabari, [Play Store](#)

A Flutter-based learning platform for BCS, Bank, SI, and other government job preparation. The app provides free and premium courses, exams, PDF notes, job circulars, blogs, and offline video access for students.

Grupo ANF, [Play Store](#)

A corporate food ordering app with separate company and employee roles. Companies can manage employee accounts and track orders, while employees can browse menus and order meals directly from the app.

Servana, [Play Store](#) / [App Store](#)

Worked on a live service booking app by fixing bugs, improving performance, and adding new features including sockets, maps, and push notifications to improve the overall user experience.
